VEERENDRANADH REDDY TANGIRALA

MSc Cybersecurity and Data Science student | Python developer | Angers, France

veerendranadhreddy11@gmail.com | github.com/veerendranadhreddy11

linkedin.com/in/veerendranadhreddy-t-aa12aa444/

PROFILE

Computer science graduate pursuing an MSc at ESAIP. Interested in ethical hacking, vulnerability assessment, secure software development, and security operations. Building practical skills through Python tooling, authorized lab assessments, testing, and clear documentation.

TECHNICAL SKILLS

Programming: Python, Java, C. **Data:** MySQL.
Security and systems: Kali Linux, Nmap, Wireshark, Linux, Windows; ethical hacking and vulnerability assessment fundamentals.
Networking: TCP/IP, OSI model, DNS, HTTP/HTTPS. **Working skills:** problem solving, collaboration, adaptability, communication.

PROJECTS

PentestMate - Personal security automation project
Python CLI with an 11-option authorized assessment workflow. Nmap TCP service scans, analyst-managed findings, target-isolated records, evidence hashing, and PDF reporting. Documented Kali validation passed 25 tests, including real scans against an isolated local service. Source: github.com/veerendranadhreddy11/PentestMate.

AI-Driven General Physician Agent - Academic capstone, in development (May 2026 onward)
Exploring Python-based data processing, model development, system evaluation, and automated recommendation concepts. No clinical efficacy or production deployment is claimed.

Future Fit College App - Academic project (November 2025)
Application for college exploration, including search, filtering, information management, and comparison features.

EXPERIENCE

Cybersecurity Intern | Future Interns | February 2026 | One month, online
Cybersecurity fundamentals, ethical hacking concepts, vulnerability identification, system security basics, and exposure to network security and risk assessment.

EDUCATION

MSc in Cybersecurity and Data Science | ESAIP Graduate School of Engineering, Angers, France | 2026-present
BTech in Computer Science and Engineering | CMR University | 2022-2026

CREDENTIALS AND LANGUAGES

Cybersecurity Internship - Future Interns, February 2026.
Full Stack Web Development with Java - QSpiders, October 2026.
Languages: English (fluent), Telugu (native), French (beginner).
